## Wine Bar

Coravin is a wine preservation system that works by piercing the cork with a hollow needle, pressurizing the bottle with argon gas, and extracting the wine through the needle into the glass. Once the wine is poured, the argon gas sits below oxygen and the cork naturally reseals itself. By looking out for the Coravin logo on the menu, you will be able to see which wines are poured by the coravin system. If you have any questions about which wines on the menu can be poured through coravin, please ask our staff.
